DETAILED ACTION

1. This office action is responding to the preliminary amendment filed on 8/2/06. Claims 1, 3-19 and 26-39 are pending in the application.

Specification

2. Applicant is suggested to place corresponding sections of the specification under the proper headings (i.e. reinserting the section Brief Description of the Drawings on pgs. 42-44 in the proper order).

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A “Sequence Listing” is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required “Sequence Listing” is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1, 3-19 and 38 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

6. Claim 19 is rejected under 35 U.S.C. 101 because it is directed to software alone without claiming associated computer hardware required for execution, and software alone fails to fall within a statutory category of invention. As claimed, the various units of the management server are nonetheless software [specification, pg. 31, lines 1-31], in addition, since applicant failed to specifically define “a management server”, the examiner is giving it the broadest reasonable interpretation as known in the art to include statutory (i.e. hardware implementation) and non-statutory embodiment (i.e. software implementation), therefore the server is not limited to statutory embodiment. Furthermore, a “storing unit” can nonetheless be interpreted as a data structure (i.e. queue, database, table etc), therefore the claim is directed to software only.

Applicant should consider claiming hardware as a part of the server to overcome the rejection.

Claims 1, 3-18 and 38 are rejected for same reason as claim 19 above.

Allowable Subject Matter

7. Claims 26-37 and 39 are allowed.
8. Claims 1, 3-19 and 38 would be allowable if rewritten to overcome the 35 USC 101 rejections above.
9. The following is a statement of reasons for the indication of allowable subject matter: performing requested job by a system having multiple processing servers and a management server was disclosed in U.S. Patent 7,464,159 and U.S. Patent Publication 2004/0225711. Chaining multiple applications to accomplish a single task was disclosed in U.S. Patent 7,610,371. The prior arts of record when taken individually or in combination do not expressly teach or render obvious the invention in the context of claims 1, 19 and 26 as a whole.
10. Neither a reference uncovered that would have provided a basis of evidence for asserting a motivation, nor one of ordinary skilled in the art at the time the invention was made, knowing the teaching of the prior arts of record would have combined them to arrived at the present invention as recited in the context of claims 1, 19 and 26 as a whole.
11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to QING WU whose telephone number is (571)272-3776. The
